

Test Preparation 02
for Course “Geoapplications Development”
<http://rgeo.wikience.org>

Please, be ready to Control Work 1.

In addition, see Test Preparation 01

You should remember and understand:

- all acronyms (NDVI, MODIS, JTS, etc.)
- formulas (NDVI, linear interpolation)
- classification of raster and vector operations
- gdalinfo, ogrinfo
- org.opengis.geometry.coordinate and com.vividsolutions.jts.geom in general
- WKT syntax
- how vector operators work
- how to check whether a given geometry is valid

You should also look at Java code and JTS TestBuilder

Examples of questions:

Select all correct WKT expressions

....
